**Whole, Organic, Live, Super Foods to Nourish and Rebuild your Body!
Eat Right and Feel Bright!**

The Essentials are the basics of your nutrition. The Essentials consist of 3 parts: edible wild microalgae, the enzymes, and the probiotics. All native diets included freshly pick raw foods and fermented foods with living cultures, this is what the Essentials replace for you. What's missing in our modern diet. The Essentials offer you a simple solution to meeting your body's fuel needs. Thousands of research results support the health, vitality and longevity benefits of consuming The Essentials.

Wild Edible Microalgae is wild *Aphanizomenon flos Aquae*, i.e. "AFA". It is so extremely nutritious and assimilable that it is considered a super food. AFA nourishes every body optimally with protein, vitamins, minerals, phytonutrients, and more.
Available in: Alpha Sun, Essentials, Simply SBGA and APA Blend.

Enzymes are a unique plant food that mimics the actions of the enzymes needed by every cell in your body. Globally, native diets included freshly pick raw foods and fermented foods with living cultures, and you can get them easily in your Essentials. *Also available singly as SBG Zymes and SBA Zymes Plus.*

Probiotics are the friendly flora that live symbiotically with you. They are fundamental to your immune system. Stress, alcohol, bad digestion, antibiotics, etc kill them and you can't thrive without them. *Available in the Essentials, the APA Blend, Acidophilis, Bifidus, and Spectrabiotic*

Viktoras and Katharine have been eating the Essentials from **Simplexity Health** for **2 decades**. Please ask us any questions you might have. We offer a 90-day money-back guarantee on our products.
